

PROGRAM EXPLAINER + GUIDED SANDBOX TOUR

One readiness record. Every handoff. Day-one ready.

WellReady connects the person, assessments, supports, experiences, applications and employer feedback. The First Skills Learning System delivers age-banded learning from kindergarten through college and technical preparation.

FIRST SHIFT

Employer readiness + retention

WellReady is the spine. The LMS is the learning environment.

The architecture separates sensitive identity and assessment data from curriculum delivery while preserving one continuous learner journey.

The result: curriculum can respond to evidence, not guesswork.

LEARN → VERIFY → HIRE → IMPROVE

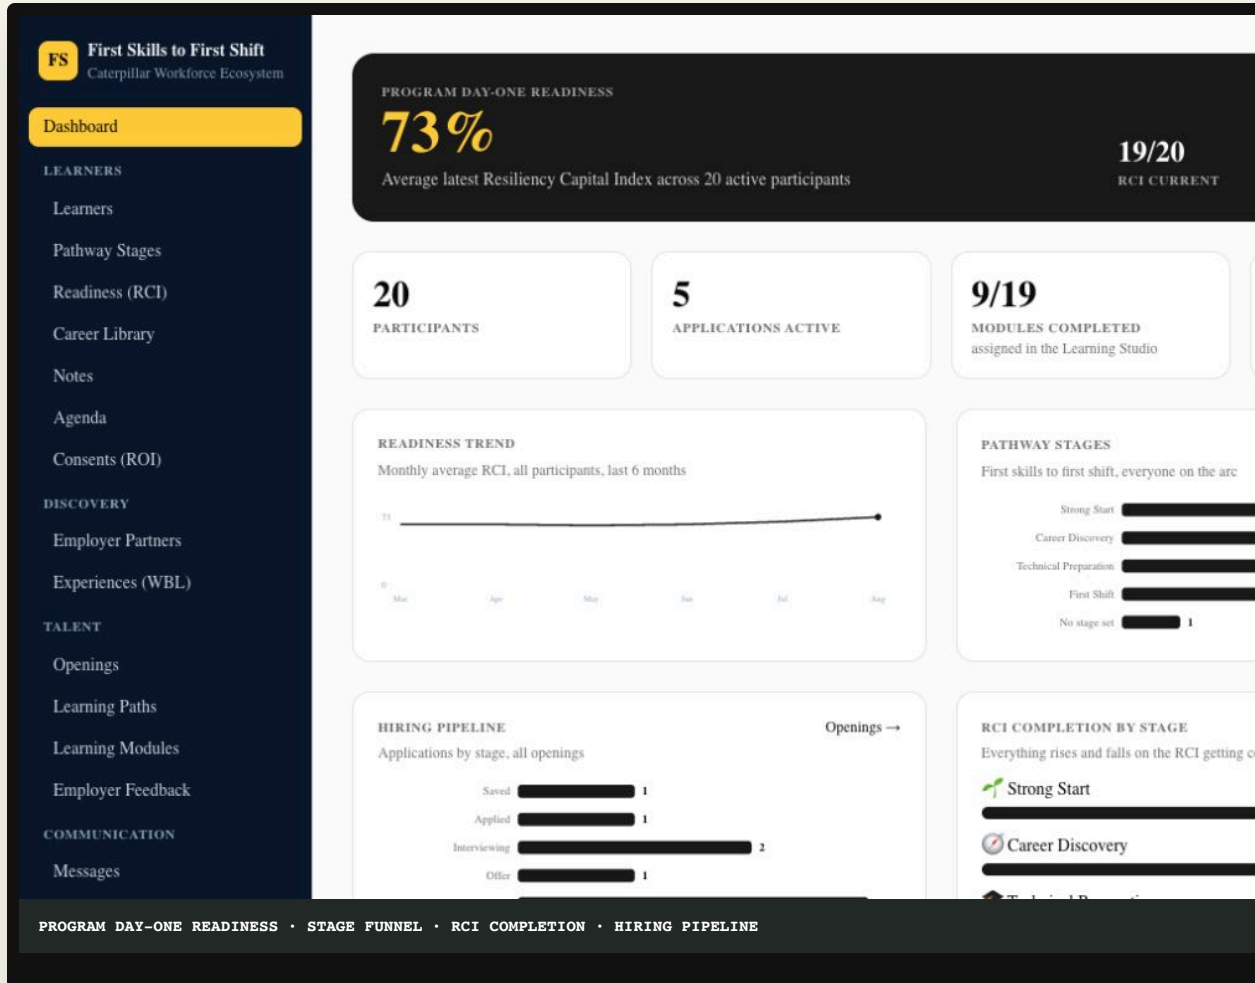

WHY AZURE MATTERS

WellReady's Azure deployment is the secure system of record that ties assessment history and role-scoped user information together across institutions.

Person + guardian relationships	IDENTITY
RCI history + check-in schedule	ASSESSMENT
Stage + assigned learning	ROUTING
Experience + application status	PIPELINE
Credentials + verified evidence	READINESS
Employer outcomes	FEEDBACK
Consent + append-only history	ACCOUNTABILITY

Everyone works from the same readiness story.

Staff can see the full arc - then open one learner and understand exactly what needs to happen next.

Start with readiness

The headline score, RCI currency, supervisor rating and attention flags make program health visible at a glance.

Move from cohort to person

Open Learners, then Ethan Kowalski to see his Technical Preparation stage and Caterpillar apprenticeship sponsorship.

Connect education to a role

Learning Paths include CNC readiness and detailed Lakeshore programs, milestones and staff-verified credentials.

Keep jobs and evidence current

Openings, modules, experiences and employer feedback connect training activity to applications and outcomes.

Scale without rebuilding

Role permissions, locations and the Instance Requests queue support an isolated community instance on one repeatable platform.

STAFF DEMO

CatDemo2026!

AVERY • STRONG START • GRADE 5

Avery sees simple pathway language, a readiness check-in and assigned learning. WellReady routes the Learn tab directly into the Elementary environment.

OPEN ELEMENTARY LMS →

Maya explores interests and careers, then raises her hand for the Caterpillar electric rope shovel-floor tour. The experience becomes visible to her support team.

OPEN HIGH SCHOOL LMS →

Ethan's sponsored pathway combines CNC readiness, Lakeshore credentials, work hours, live openings and an application already in Interviewing.

OPEN COLLEGE + ADULT LMS →

See the entire thesis in about 15 minutes.

START THE DEMO →

All names, contact information and records below are fictional. Text and credentials remain selectable in this PDF.

1

1. Read the staff dashboard top to bottom.

Use the program readiness score, stage funnel, RCI completion and hiring pipeline as the shared operating picture.

2

2. Open Learners → Ethan Kowalski.

Notice Technical Preparation, Caterpillar sponsorship and the hiring-sync activity that moved his CNC application to Interviewing.

3

3. Open Learning Paths and Openings.

Review CNC readiness, Lakeshore pathways, staff-verified credentials and the live job/application connection.

4

4. Sign in as Jordan.

Open My Learners, choose Avery's RCI check-in, then open Avery's assigned training module into the Elementary LMS.

5

5. Sign in as Maya.

Open Discover → Experiences and find "Hand raised" on the Caterpillar electric rope shovel-floor tour.

6

6. Sign in as Ethan.

Open Pathway, Learn and Openings. Follow the sponsored-apprentice story from college credential to paid shift.
